Indicator Information

Series Code:
EN.ATM.CO2E.PC

Indicator Name:
CO2 emissions (metric tons per capita)

Description:
Carbon dioxide emissions are those stemming from the burning of fossil fuels and the manufacture of cement. They include carbon dioxide produced during consumption of solid, liquid, and gas fuels and gas flaring. This indicator measures metric tons per capita. This environmental indicator helps measure a country's contribution to greenhouse gas emissions and climate change. Lower values indicate better environmental performance.
